INFRASTRUCTURE SERVICES

## Crowdfunding Instructions

*My Ether Wallet*

**Disclaimer:**

Titanium Blockchain Infrastructure Services is not affiliated with MyEtherWallet or Changelly. These instructions are provided for informational purposes and are offered without warranty. TBIS does not have control over changes to how external services operate.

Step 1. Visit [myetherwallet.com](https://myetherwallet.com)

Go to [myetherwallet.com](https://myetherwallet.com). Beware of phishing sites. Make sure to check the URL in your browser.

Step 2. Set up a new wallet (optional)

If you do not already have a wallet set up, follow the instructions provided by MEW to get one set up. Be careful to save your keystore file in a safe place.

Step 3. Set up your wallet to receive Titanium BARs

On the right-hand side of your screen, you will see a button labelled 'Add Custom Token'. Click on this button and three fields will appear:

**Token Balances**

[Load Tokens](#)

Remember, you can always view your Balances On <https://etherscan.io> or [Ethplorer.io](https://ethplorer.io)

Not seeing your token? [Learn how to Add a Custom Token](#)

[Add Custom Token](#)

[Learn how to Add a Custom Token](#)

**Token Contract Address**

**Token Symbol**

**Decimals**

[Save](#)

Enter the following values

**Address: 0xc7579bB99Af590EC71c316E1Ac4436C535039594**

**Token Symbol: BAR**

**Decimals: 18**

Click 'Save'

You should then see a balance of 0 BAR in your wallet. Once this is done, your wallet is ready to receive Titanium BARs.

#### Step 4. Get some Ether (optional)

To purchase BARs, you will need to send Ether to the contract address specified on our website. If you do not have Ether, you will need to either purchase some from your exchange of choice or use the Changelly tool provided on our website (enter your own MEW address when Changelly prompts you for 'Recipient Address').

#### Step 5. Send Ether to the contract address listed on our website.

Now, all you need to do is send Ether to our contract address and your BARs will be automatically transferred to you. In MEW, click 'Send Ether and Tokens' and enter the crowdfunding address found on our website, the amount of Ether you want to send, and the maximum amount of gas to be sent. We recommend entering a minimum of 200,000 as the gas limit.

The screenshot displays the MyEtherWallet interface for sending Ether and Tokens. The top navigation bar includes 'Generate Wallet', 'Send Ether & Tokens', 'Send Offline', 'Withdraw DAO', 'Claim DGD', 'Deploy Contract', 'View Wallet Info', and 'Help'. The main heading is '+ Send Ether & Tokens'. On the left, 'Account Information' shows the account address (with a placeholder 'Your address displays here'), account balance (0 ETH, 0 ETC), token balances, and equivalent values (0 USD, 0 EUR, 0 BTC). The 'Transaction History' section shows a link to etherscan.io. The 'Send Transaction' section on the right includes a 'To Address' field with the placeholder 'Crowdfunding address goes here', an 'Amount to Send' field with 'Number of ETH to send' and a dropdown for 'ETH (Standard Transaction)', and a 'Gas' field with '70000'. A '+Advanced: Add Data' link is visible below the gas field. A 'Generate Transaction' button is at the bottom. A disclaimer at the bottom of the page states: 'MyEtherWallet is a free, open-source service dedicated to your privacy and security. The more...'

That's it! Once the transaction is confirmed, you will see your BAR balance in your wallet.
